

Industrial

Hose Nozzles

Description

FPPI's 1-1/2" combination fog nozzle, is manufactured from precision injection molded poly-carbonate. Suitable for industrial and commercial installations. Meets requirements according to applicable UL and FM standards. Product is not listed and has not been tested by Underwriters' Labs or Factory Mutual Research.

Installation

Can be used in any number of industrial or commercial applications. Typical uses are fire hose racks, reels and commercial watering applications. Ideal for use where loss

by theft is high. Unlike brass or bronze nozzles, injection molded plastic has a low replacement cost when the nozzle has been lost, stolen or vandalized.

Specifications

Material:
Injection molded
poly-carbonate

Color:
Red

Type:
Combination Fog
Nozzle

Size:
1-1/2" NH

Flow Rate:
75 GPM
