Fire Main Gate Valve

OS&Y Valves (Outside Stem & Yoke), RS

Description
FPPI OS&Y Valves feature a bronze* body (ASTM C83600) cast iron hand wheel, with steel, stainless steel, and brass components for extended service life. OS&Y valves (outside stem and yoke) are perfect for sprinkler system monitoring. When the valve is opened, the stem is visible above the hand wheel. In the closed position, the stem is concealed inside the valve body. This allows for immediately identifying if the valve is “OPEN” or “CLOSED”. OS&Y valves can also be fitted with external tamper switches for central station or panel monitoring.

Installation
Install in accordance with customary installation practices.
